

Danh mục 16 ebook thuộc Bộ sưu tập 2026 Wiley Semiconductors eBooks Library của nhà xuất bản

TT	số ISBN	Tên sách	Tác giả
1	9781394300846	Signals, Systems, and Transforms: Concise Coverage from Theory to Application	Cohen
2	9781394319114	Next-Generation Transistors Based on Phase-Transition	Alam
3	9781394374984	Stripline and Microstrip Resonators and Bandpass Filters	Zakharov
4	9781394311453	FET Devices Post CMOS Theory and Applications	
5	9781394335800	Smart Chips for Smart Devices	
6	9781394199556	Fundamentals of Electron Emission Physics	Jensen
7	9783527414291	Light Scattering at Interfaces: An Extended Transfer Matrix Approach	Sigel
8	9781394294589	Practical Quantum Computing with Superconducting Qubits and Cavities	Koch
9	9783527355730	Properties and Applications of Advanced Materials	Sharma
10	9783527355747	Physics of Organic Light-Emitting Diodes	Tsuboi
11	9783527356225	Radio Frequency Sputtering: Thin-Film Deposition and Device Applications	Sharma
12	9781394307319	Micro and Nano Semiconductor Devices for Digital, Analog and Sensor Design	Tripathi
13	9781394363643	Compilation for Quantum Computing	Tan
14	9781394402410	Calibration: A Technician's Guide	Cable
15	9781394351022	Computational Modelling of Additive Manufacturing	Yan
16	9781394295081	A Python Guide to Programming the Finite Element Method	Griffiths

IEEE
